*This comparison illustrates the estimated electricity costs for a typical Schedule TOU-GS-1-E commercial customer within the jurisdiction of the Town of Apple Valley with an average monthly consumption of 945 kilowatt-hours (kWh). This is based on SCE's 2019 climate zone data within SCE's Baseline Region 14 (which includes the Town of Apple Valley) and published rates as of January 1, 2020.

Generation Rate reflects the cost of producing or purchasing electricity to power your business. This rate will vary depending on your service provider and rate plan.

SCE Delivery Rate is a charge assessed by SCE to deliver electricity to your business. This rate depends on usage.

Surcharges represents the Cost Responsibility Surcharge (CRS) and Franchise Fee (FF) that are applicable to Community Choice Aggregation (CCA) customers and SCE customers that elect a Green Rate. The CRS is a surcharge to recover costs associated with power purchases made on behalf of customers prior to a customer's switch to a CCA or SCE Green Rate. The FF recovers taxes owed to a city in exchange for allowing SCE to utilize electrical distribution lines throughout the property of the city. SCE acts as the collection agency for the FF surcharge which is levied by cities and customers for all customers.

The Electric Generation Rates chart illustrated is based on Apple Valley's Town Council vote to set AVCE's rate at 3% less than the current SCE rates.
